UNIVERSAL HINGE FOR SIDE ENTRANCE DOORS WITH CORNER UPSTAND

HAHN KT-SN

DESCRIPTION

HAHN KT-SN – SNUG FIT FOR VERY SLENDER DOOR FRAMES

The Hahn KT-SN versions have the same properties as the Hahn KT-SV. An additional bracket for upstand fastening provides the door hinge with added positive fit, which ensures additional stability of the element depending on the design of the sections. Even with regard to protection against break-ins, these small hinges have proven themselves in tests conducted by independent testing laboratories, thanks to the integrated anti-burglar safeguard. As of May 2010 we also offer self-tapping screws with the KT-SN hinge which reduces the installation time significantly.

- Areas of application: Doors made of narrow plastic sections for residential buildings
 - Side entrance doors
 - Exterior doors
 - Interior doors
 - Entrance doors for flats
- Same appearance retained after adjustment
- Efficient alignment, all adjustments can be carried out by a single person
- Door hinges are largely pre-assembled
